The Job Guide

One day workshop for students

About The Job Guide Program

The Job Guide website helps young people explore career options and make subject choices. It provides information about a wide range of occupations and the education and training pathways that lead to them. It also includes useful information about the job search process, provides details of available government assistance and suggests where to go for further information.

Job Guide is written mainly for Year 10 students. The guide aims to list the most direct education and training pathway to an occupation.

Job Guide contains information about the types of courses that may be required to enter certain jobs and advises what subjects may be needed to get into these courses.

Year 10 students should always check the specific entry requirements of the courses that they are interested in with their school Careers Adviser before making subject choices for Years 11 and 12.

Students will need individual access to the internet for each workshop.

The Job Guide workshop is designed for groups of ten students, preferably in Year 9 or Year 10. Workshops may be adapted for smaller groups of at-risk or disengaged students.

The Job Guide Workshop may include:

- What is available on the Job Guide website?
- How to use the Job Guide Search Engine?
- Building your career – exploring options, looking towards the future, skills need occupations,
- What is a Learning Pathway? – learning experiences, different types of learning, training providers, qualifications
- Apprenticeships and traineeships – school based and full time.
- What about a Vocational Pathway? – VET in School and TAFE
- Looking for Work – finding vacancies, applying for positions,
- Building a resume to impress

Fee for Service:

If you are interested in providing this workshop for a group of your students, please contact Western Student Connections to negotiate a program to suit your student group.
